In mathematics, a recurrence relation is an equation that recursively defines a sequence or multidimensional array of values, once one or more initial terms are given: each further term of the sequence or array is defined as a function of the preceding terms.. The term difference equation sometimes (and for the purposes of this article) refers to a specific type of recurrence relation.

Euclidean. As most definitions of color distance are distances within a color space, the standard means of determining distances is the Euclidean distance. If one presently has an RGB (Red, Green, Blue) tuple and wishes to find the color difference, computationally one of the easiest is to call R, G, B linear dimensions defining the color space.

The Demise of the Current M-Theory. Authors: Savior F. Eason Comments: 13 Pages. This paper proposes not a 5th, but 9 fundamental forces, and why the 8th might establish M-theory as not just incomplete, but wrong, and presents a hypersymmetric marrying of relativity and quantum mechanics, in a thought proposing a cheat to the infamous  $e=mc^2$ .

MODULE-I INTRODUCTION: Electromagnetic theory is concerned with the study of charges at rest and in motion. Electromagnetic principles are fundamental to the study of electrical engineering. Electromagnetic theory is also required
