A breadboard is a construction base for prototyping of electronics.Originally it was literally a bread board, a polished piece of wood used for slicing bread [citation needed]. In the 1970s the solderless breadboard (a.k.a. plugboard, a terminal array board) became available and nowadays the term "breadboard" is commonly used to refer to these.. Because the solderless breadboard does not ...

Motivation to commit scientific misconduct. According to David Goodstein of Caltech, there are motivators for scientists to commit misconduct, which are briefly summarised here.. Career pressure Science is still a very strongly career-driven discipline. Scientists depend on a good reputation to receive ongoing support and funding, and a good reputation relies largely on the publication of high ...
