Analysis of variance (ANOVA) is a collection of statistical models and their associated estimation procedures

(such as the "variation" among and between groups) used to analyze the differences among group means in a sample. ANOVA was developed by statistician and evolutionary biologist Ronald Fisher. In the ANOVA setting, the observed variance in a particular variable is partitioned into ...

Analysis of variance - Wikipedia

Cool post. It seems to be a general phenomenon what happens when applied sciences (psychology, biology, economics) adopt methods of the [relatively more] pure sciences (physics, statistics, mathematics), or when newer disciplines (synthetic biology) venture into space occupied by an older one (electrical engineering).

Statistics vs. Machine Learning, fight! | AI and Social

Project-based learning (PBL) is a student-centered pedagogy that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge, or problem.
