Boltzmann's constant (k) is a universal constant that defines what we mean by one degree of temperature. It is the conversion factor that converts from degrees to conventional units of energy per particle. It is intimately related to the universal gas constant (R) which converts from degrees to conventional units of energy per mole.

3.2.2 Nullness method annotations. The Nullness Checker supports several annotations that specify method behavior. These are declaration annotations, not type annotations: they apply to the method itself rather than to some particular type.

The Checker Framework Manual: Custom pluggable types for Java

Text such as a title, labels, and annotations can be added to the plot between the `plt.plot` and the `plt.show` commands. We can also change the axes if we don't like the default choice and add grid lines to the plot:
