ERGODIC THEORY of DIFFERENTIABLE DYNAMICAL SYSTEMS Lai-Sang Young* Department of Mathematics University of California, Los Angeles Los Angeles, CA 90024 Email: lsy@math.ucla.edu These notes are about the dynamics of systems with hyperbolic properties. The setting for the first half consists of a pair (f, μ) , where f is a diffeomorphism

ERGODIC THEORY OF DIFFERENTIABLE DYNAMICAL SYSTEMS Dedicated to the memory of Rufus Bowen Abstract. -- If f is a G TM diffeomorphism of a compact manifold M , we prove the existence of stable manifolds, almost everywhere with respect to every f -invariant probability measure on M .

Ergodic theory of differentiable dynamical systems - IHES

Following the concept of the EMS series this volume sets out to familiarize the reader to the fundamental ideas and results of modern ergodic theory and to its applications to dynamical systems and statistical mechanics. The exposition starts from the basic of the subject, introducing ergodicity,

Ergodic Theory of Chaotic Dynamical Systems - NYU Courant

Ergodic Theory and Dynamical Systems focuses on a rich variety of research areas which, although diverse, employ as common themes global dynamical methods. The journal provides a focus for this important and flourishing area of mathematics and brings together many major contributions in the field.

A dynamical system is a manifold M called the phase (or state) space endowed with a family of smooth evolution functions ϕ_t that for any element of $t \in T$, the time, map a point of the phase space back into the phase space. The notion of smoothness changes with applications and the type of manifold. There are several choices for the set T . When T is taken to be the reals, the dynamical ...
