Why, specifically, did you "have to" rename the Active Directory? Having your AD forest name match your public-facing domain name is not remotely "required," and it seems like a minimal/non-existent problem that "some other organization" might end up buying "yourdomain.local" and cause DNS issues.

Why you shouldn't use .local in your Active Directory

There's a lot more that you have to consider if you're thinking about burying a shipping container to be used as a bunker. They're not designed for that and you could end up being crushed if you don't know what you're doing.
